

Environment Policy Statement

Jet Stream Management is committed to incorporation of environmental considerations in decision making and the operations of its business, so as to reduce the Company's environmental footprint and to eliminate the risk of environmental complaints, infringements and non-compliances.

Jetstream recognises that responsible environmental management is an integral element of our responsibility to our clients, the community, and other stakeholders. To achieve Zero Harm to the environment we will:

- ✓ Ensure that all persons who can affect environmental performance are aware of and comply with their environmental responsibilities
- ✓ Commit to meeting our compliance obligations
- ✓ Undertake to protect the environment including the prevention of pollution & environmental harm
- ✓ Commit to continual improvement to be achieved by responding to monitored facts & data
- ✓ Commit to planning actions to achieve environmental obligations
- ✓ Consult and communicate with employees, clients and key stakeholders and the community on social environmental issues.

All personnel are responsible and accountable for participating in the implementation of our certified ISO 14001 Environmental Management System by identifying and proposing possible improvements in line with the Company objectives, Client needs and social expectations of performance.

This policy is communicated to all levels of the organisation and by publication in appropriate places.

John Saundry
Managing Director
